## EXPERIENCE

### **Turbin3— Builder**

July 2025 - August 2025

Intensive Solana blockchain development program focusing on Rust and TypeScript. Building full-stack decentralized applications, smart contract development, and Web3 integrations on Solana's high-performance blockchain

## EDUCATION

### **KIET Group of institutions, Ghaziabad — CSE**

2024 - 2025

KIET Group of institutions • AKTU • Delhi NCR

## PROJECTS

### **mintCraft— AI-NFTverse**

mintCraft is a decentralized marketplace where AI generates content (art, music, text, code) that's instantly minted as NFTs on Solana, with built-in ownership tracking and monetization. Users can also register their own AI models and earn from usage fees.

Techstack- Solana, Rust, Anchor, Next.js, TypeScript, Tailwind CSS, Express, tRPC, Prisma, PostgreSQL, IPFS, codama, zod

### **Learn—edTech platform**

Learn is a platform that allows user to create flashcards and quizzes from the pdf provided by the user. It uses AI to generate questions and answers from the pdf and also allows user to create their own questions and answers. describe in one word

Techstack- Next.js, TypeScript, Tailwind CSS, Express, Prisma, PostgreSQL, zod, gemini, OpenAI, react-pdf, react-hot-toast

### **Histograph— BrowserHistoryManager**

Histograph is a terminal-based tool that fetches the browser's history and builds a graph of the user's browsing history.

Techstack- golang, bubble, bubbletea, sqllite

## SKILLS

### Languages

Rust, Typescript, golang

### Frameworks

web3.js, anchor, codama, Node.js, Next.js, React, trpc, express, Tailwind

### Tools

Git, github, postman, docker, helius

### Databases

PostgreSQL, MongoDB, Appwrite, Firebase, Redis
